

30 OCT 1974

MEMORANDUM FOR: Director of Logistics
SUBJECT : Project SAFE

Mike:

STATINTL Per our discussions, I have read the SAFE report in some detail and believe that this project will be implemented at least in reduced form. I agree with your recommendation that an Office of Logistics (OL) representative should be on the task force proposed for the system design phase. I would further propose that [redacted] (because of his R&D experience with OTS) be our nominee for this position. He would, of course, be instructed to involve LSD, PD, PSD, and other elements of OL as required.

I was only able to obtain two additional copies of the report. I have sent one directly to PSD and the second is attached hereto for eventual transmittal to PD when the O-D/L is finished with it.

Also attached for your information is a copy of Dave's estimate based entirely on the summary sheet (attached to the estimate). As we discussed, I agree that this estimate is low and that, based on information available, only a ball-park guess. I further agree that \$3 million represents a better number than the attached \$2,188,000 but would be unwilling to hang my hat on any number pending agreement on the SAFE system design and a detailed facilities engineering analysis thereof.

STATINTL [redacted]
Chief

Real Estate and Construction Division, OL
